invisible palm trees  
august 1978

abstract

given the incredible heat and intensity of sunlight in scottsdale, arizona.

method create a method of 'invisible' drawing as a way of striking up acquaintance with new students.

make drawings of palm trees using yellow felt pen which can only be seen in direct sunlight using polarized dark glasses, or indoors under incandescent light.

q e d ..what is style? every flower has it; every animal has it; every individual worthy the name has it in some degree, no matter how much sandpaper may have done for him. it's a free product, a byproduct, the result of an organic working out of a project in character and in one state of feeling. flw 1910
